

Wantirna Reserve Dog Park and Playspace Upgrade – Consultation Summary

What you said	What we did
Wantirna Reserve Dog Park	
Request separate enclosures for dogs.	Two enclosures will be delivered at Wantirna Reserve: one for small and shy dogs, and another larger enclosure for bigger and more sociable dogs.
Have larger open spaces and lawn areas for dogs to run freely.	Large open lawn areas have been incorporated into both the small and main dog enclosures to provide ample space for dogs to run and play.
Provide essential amenities for dog parks.	Both enclosures will include shelters with picnic tables, various seating options, drinking fountains, bins, tree shade, and fencing.
Incorporate a greyhound only off-leash area.	Following further investigation, Wantirna Reserve was deemed unsuitable for a greyhound-only off-leash area due to heavy traffic, which would impact safety and management requirements.
Wantirna Reserve Playspace Upgrade	
Provide inclusive play elements and a large play tower to encourage users of all abilities and ages.	The play area will include an all-abilities swing seat with a harness, various musical instruments, nature play elements with a swale and cubby house for an inclusive play experience, as well as a large play tower and combination unit to offer diverse play opportunities.
